

# Hello!, I'm Patricio Correnti

**Developer + Designer = Killer Combo \* 15 years of experience.**

I started working on websites as a full-stack developer at the time when "dynamic web" or "hypertext" were novel concepts.

I've faced Internet Explorer 6 and spent great moments with ActionScript.

I've worked on monolithic systems with years and years of code layers making incremental and iterative improvements.

I became remote so now I work on projects all around America.

**Always ready for the next challenge!**
